

Mirroring360 is a program that allows users to share the screen of their personal devices to a target computer without any hardware or cable. This program works with iPad, iPhone, Chromebook, Android, Windows, and Mac. By using it, users can easily send their screens to a computer, which can then be projected out for viewing in the whole group study room.

In order to use Mirroring360, user will need to install either an app or extension on his/ her device that the screen user wants to share.

Installing device apps:

iPhone, iPad

Download the **Mirroring Assist** app from the iOS App Store.

Android

Download the **Mirroring360 Sender** app from the Google Play Store.

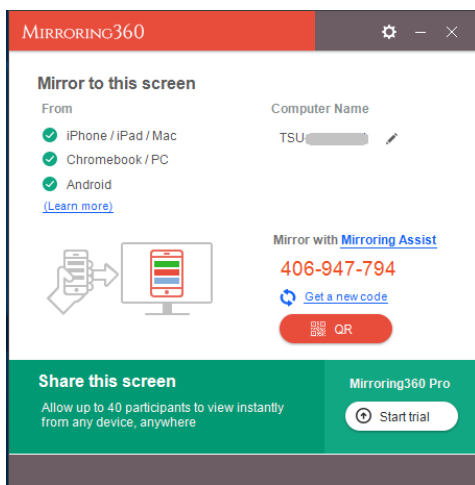

Chromebook, PC, Mac

Download the **Mirroring360 Sender for Chrome** extension from the Chrome Web Store. Please note, user must have the Chrome browser installed on his/her computer to use Mirroring360.

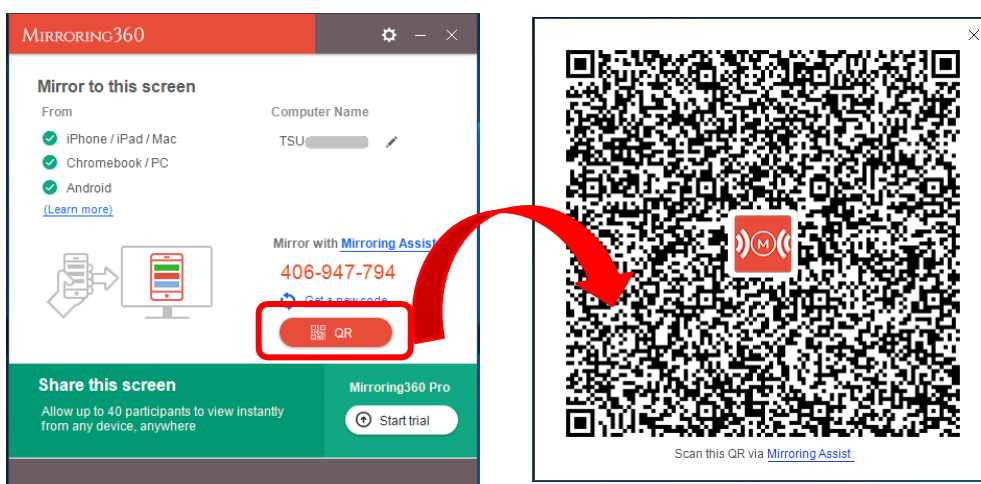

To start the Mirroring360

1. Double click the icon  to execute Mirroring360 program.

2. The Mirroring360 Assist menu shows on the panel.

3. Displays Mirroring ID or click 'QR' button to show the QR code to be used for connection.

5. Use the app to scan the QR code or enter the Mirroring ID in the extension in Chrome browser to start the connection to the panel.

(If more than one device are shown in the app, choose the “Computer Name” showing on the screen.)

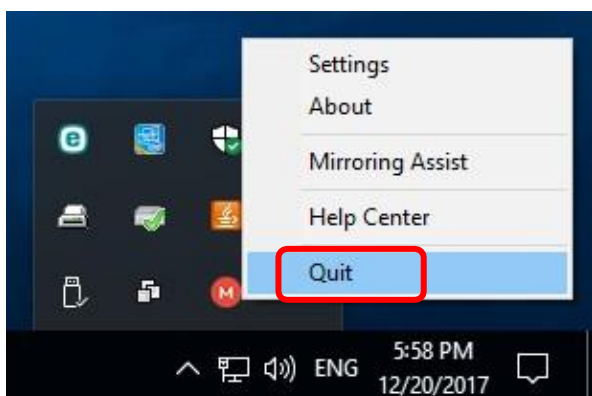

6. The random generated passcode shows on the group study room computer.

7. Enter the passcode in the app or extension in Chrome browser and then the device starts to present the screen to the panel.

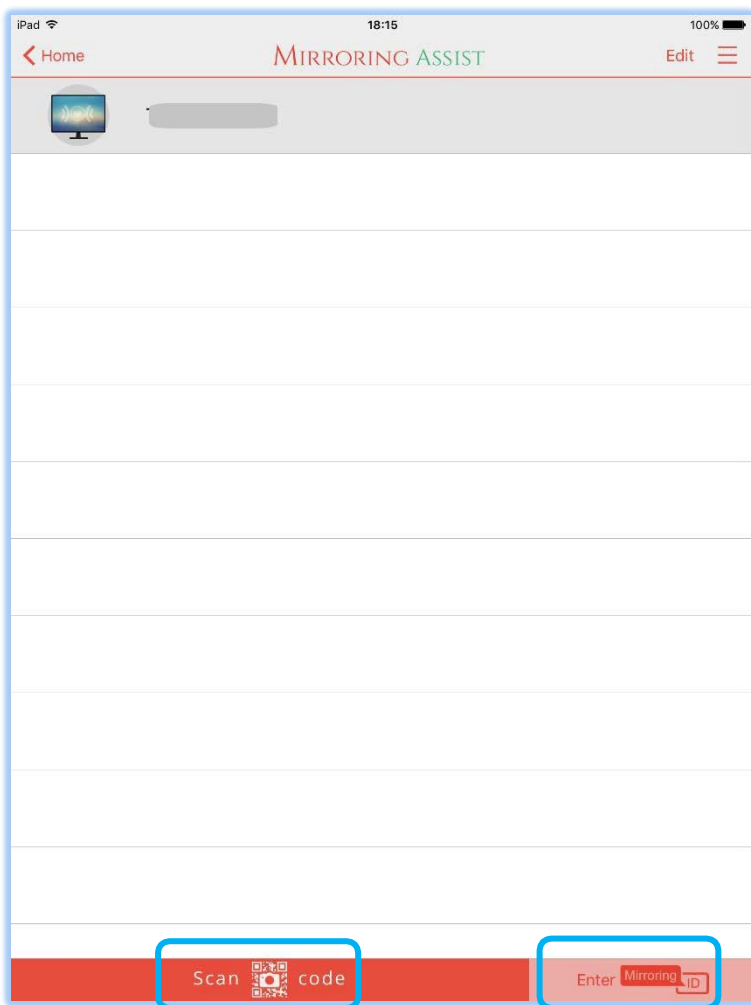

To end the Mirroring360

1. Go to the panel.
2. Right click the Mirroring360 icon in the system tray (at the bottom right hand corner of the desktop)
3. Select 'Quit' from the menu.

Using *Mirroring Assist* app in iPad and iPhone
