

Election Statement

GUO Jiafu

Candidate No. 2 | All Undergraduate Students

I am GUO Jiafu, a Year 2 undergraduate student majoring in Digital Futures and Humanities. I am standing as Candidate No. 2 to represent All Undergraduate Students in the Senate. I am running because I experience many of the same academic frustrations as other students and want to help turn those concerns into practical action.

What I can offer is a practical and honest approach to representation. I will listen carefully, distinguish individual cases from recurring problems, raise well-founded concerns through the appropriate University channels, and explain clearly to students what has and has not been achieved.

If elected, I will focus on three practical priorities:

First, fairer course registration. I will raise concerns about automated course grabbing, informal course trading, and course quota allocation, and advocate for a fairer and more transparent registration process.

Second, greater assessment transparency. I will advocate for students to receive relevant component marks, grading criteria, and feedback so they can understand how their final grades are determined.

Third, simpler academic procedures. I will organise official information on programme transfers, excess study load, and other common academic applications into clear, student-friendly guidance.

Through my Xiaohongshu accounts, I have shared university-related information and answered questions from fellow students. If elected, I will expand this work by collecting concerns through email, WhatsApp, and WeChat, raising recurring issues with the relevant offices, committees, or the Senate, and reporting the outcomes to students.

I will work to build a fairer, clearer academic experience for undergraduates across every Faculty and School.

Vote for GUO Jiafu | Candidate No. 2
